

ABSTRACT

The present invention is a toggle fastener for providing a means to attach a screw or bolt to a drywall wall. The toggle consists of an elongated flexible tube having open opposite first and second ends. The tube is dimensioned to receive the screw or bolt. A pair of wings extend perpendicularly from the first end of the tube. A cylindrical member is mounted to the tube, the cylindrical member having an internal passage, the internal passage dimensioned to permit the cylinder to slide snugly over the tube.
